Cancer Prevention Vaccine

You have the power to prevent some cancers in your children.

- Each year in the U.S. there are 26,000 cancer cases that could be prevented with human papillomavirus (HPV) vaccine.
- HPV vaccine can prevent 9 strains of cancer.
- Three doses of HPV vaccine should be given to adolescents aged 11-12 years before exposure to the virus.
- HPV vaccine costs are covered under most insurance programs, Medicaid, and the Vaccines for Children Program (VFC).

To prevent HPV cancers, contact your healthcare provider or the county health department. **Don't delay, call today.**
