

MANAGEMENT OF GENITAL LESIONS IN WOMEN'S HEALTH USING ELECTRONIC PHOTOGRAPHY TRANSFER CONSULTATION

- Telemedicine is a new approach in clinical medicine, where medical information is transferred through interactive, audiovisual media for consulting purposes. Program faculty will provide an overview of the growing use of this service for health care delivery. Evidence-based information will be provided regarding the utility of telemedicine incorporation into clinic services. This innovative change offers promise in improving care for all. ■

The content of this program is based on the policies and procedures of the Alabama Department of Public Health, Alabama and federal statutes, rules, regulations, and guidelines. Viewers not employed by the ADPH should always check to clarify whether the content is accurate according to the statutes, regulations, and policies of their jurisdiction and agency.
