

Great Achievements Met for Providers with Extraordinary Vaccination Coverage Rates

The Immunization Division of the Alabama Department of Public Health (ADPH) is proud to present the results of the 2012 Vaccines for Children (VFC) site visits for those clinics that achieved vaccine coverage levels of 100 percent, over 90 percent, and over 80 percent. During 2012, ADPH staff performed VFC-AFIX quality improvement visits to VFC provider clinics. These visits allowed ADPH staff to determine if VFC providers are following VFC guidelines, to offer education and CEU credits for clinic staff, and to determine vaccine coverage levels of the clinic. The ADPH Immunization Division congratulates these VFC providers for an extraordinary accomplishment in 2012.

100% Vaccination Coverage Rates
