

ALABAMA SAFE SLEEP OUTREACH PROJECT

Satellite Conference and Live Webcast

Wednesday, August 26, 2015, 10:00-11:30 a.m. (Central Time)

11:00 a.m.-12:30 p.m. (Eastern) • 9:00-10:30 a.m. (Mountain) • 8:00-9:30 a.m. (Pacific)

In 2013, Alabama's infant mortality rate was 8.6 infant deaths per 1,000 live births. There were 500 infants that died before their first birthday. Of those 500 infant deaths in 2013, 107 were from unsafe sleep related causes; accounting for 20% of the total infant mortality rate. Preventing these 107 unsafe sleep related deaths would have decreased the current infant mortality rate to 6.8 infant deaths per 1,000 live births. This program will review the A-B-Cs of safe sleep and how to provide safe sleep environments for infants less than one year of age. Presenter will discuss the Safe to Sleep® campaign, and explain funding opportunities for a limited number of outreach projects to reduce the risk of SIDS and other sleep-related causes of infant death in Alabama.
