

ALABAMA RADON MEASUREMENT PROVIDERS (As of November 29, 2016)

Two organizations maintain professional listings of radon measurement service providers who have had specific training and/or passed a written test on radon measurement testing in homes or other buildings: the American Association of Radon Scientist and Technologists, Inc. (AARST) and the National Radon Safety Board (NRSB). Being listed in this report is not an endorsement by the Alabama Department of Public Health or the Alabama Radon Program. We do not recommend one company or individual over another, however we do recommend Alabama measurement services over out of state service providers simply for the added cost of extra travel. Being on this list merely means that those listed have attended a training course, passed a written exam, and have agreed to perform in compliance with accepted procedures and protocols of the listing organization.

The following list of Measurement Service Providers for Alabama was derived from the AARST and NRSB Web site listings. These individuals may be certified by more than one organization and should be able to produce some type of identification or verification. For more information, contact the Alabama Department of Public Health, 1-800-582-1866, or the Web sites for AARST (<http://www.nrpp.info>) or NRSB (<http://www.nrsb.org>).
